

Industrial Control cable

Stay in control with Garland's new Industrial Control Cables.

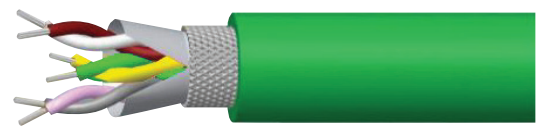

Garland has added three new products to its successful data products range.

The new Industrial Control cables expand on the RS-485 and DMX cable range and push the product set towards more sophisticated data protocols used in the industrial sector.

The range is designed for common applications and includes cables for Data highway, Interbus and Control & Instrumentation.

The new Pro Series cables are Green Star compliant and use BEP PVC where applicable. Jackets range from PVC to PUR dependent on the application.

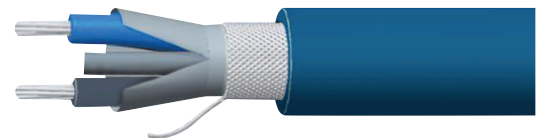

As with all Garland Pro Series products, the Green Star compliance allows these industrial cables to be used in the most discerning of installations.

MJ3003 GN305

MJ8001 GY305

MJ9000 BE305

Part Number	MJ3003 GN305	MJ8001 GY305	MJ9000 BE305
Construction	3 pair	2 core	1 pair
Conductor	24AWG	18AWG	20AWG
Insulation	polyolefin	polyolefin	polyolefin
Features	OA + TC Braid Screen	OA Screen	OA + TC Braid Screen
Jacket	Polyurethane	PVC	PVC
Application	Interbus	Control & Instrumentation	Data Highway

With Garland, you are always well connected.
